ILLUMINA LA TUA CREATIVITA'

Galaxy profili alluminio led integrati in cartongesso è una linea di prodotti costituiti da lastre di cartongesso con profilo centrale in alluminio, utilizzati per creare tagli di luce, giochi e disegni su pareti, contropareti e controsoffitti.

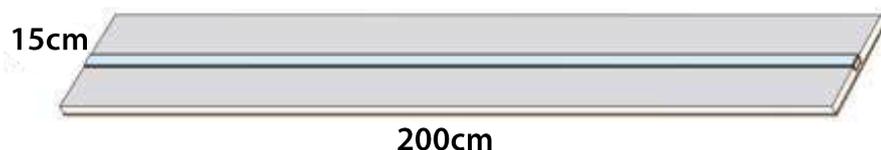

- Facilità di posa;
- Elevata qualità estetica;
- Profilo in alluminio che funge da dissipatore di calore;
- Effetto complanare rispetto alla superficie;

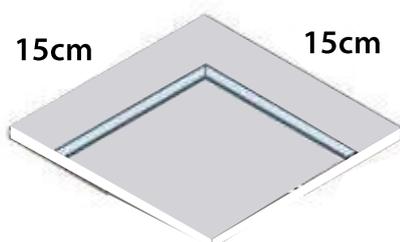

Pannelli in cartongesso e fibra per la creazione di luce Led diretta per pareti, contropareti e controsoffitti. Spessore 12,5 mm composti da 9,5 mm di cartongesso e 3 mm di fibra, forniti completi del profilo dissipatore in alluminio per strip Led e schermo in policarbonato opalino. I pannelli sono adatti per essere tagliati a misura senza scheggiare la struttura. Le fonti luminose e i componenti elettrici sono esclusi. Test termici effettuati sui vostri pannelli dimostrano la compatibilità con l'impiego di strip Led 24W/mt con alimentazione 24 V. Si consiglia di applicare strip Led con punti luce molto ravvicinati per avere una fascia luminosa continua.

Dissipatore in alluminio e copertura in policarbonato opalino sono materiali di qualità e made in Italy.

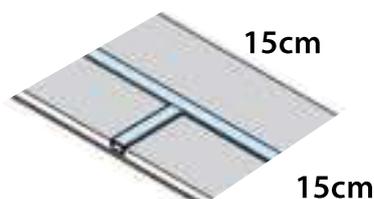

Cosa Realizziamo

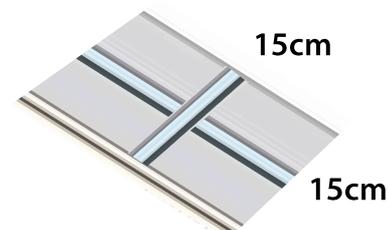

Pannello spessore mm. 12,5
 Dimensione: cm. 15 x 200
 Completo di dissipatore in alluminio.

Raccordo ad angolo sp. mm. 12,5
 Dimensione: cm. 15x15
 Completo di dissipatore in alluminio.

Raccordo a "T" sp. mm. 12,5
 Dimensione: cm. 15x15
 Completo di dissipatore in alluminio.

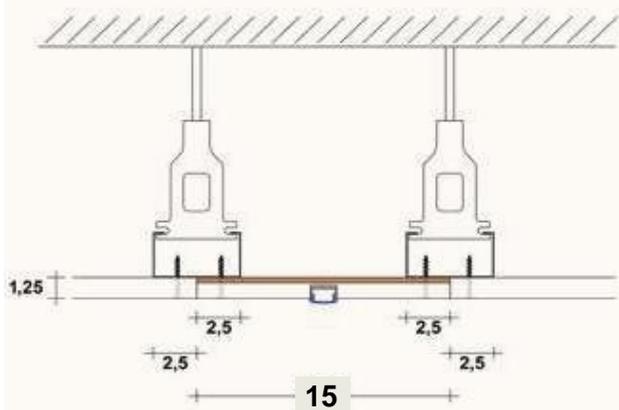

Raccordo a croce sp. mm. 12,5
 Dimensione: cm. 15x15
 Completo di dissipatore in alluminio.

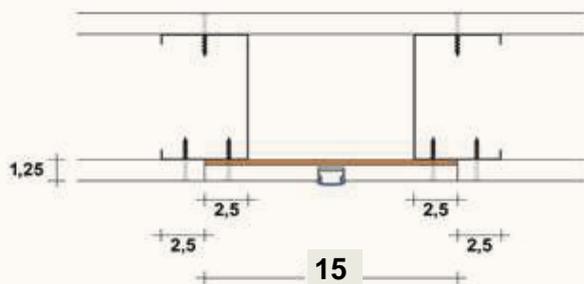

Freccia led viene avvitata sui tradizionali traversi da controsoffitto mm 50x15 o 50x27 i quali vanno sovrapposti per 2,5 cm, lasciando liberi altrettanti 2,5 cm per il fissaggio della lastra di cartongesso. Quando si giunta in testa un pannello con l'altro, dietro va sempre applicato il profilo metallico. Si prosegue poi con il fissaggio della lastra di cartongesso a filo della freccia led e alla successiva finitura con garza e stucco.

Alcuni esempi

Applicazione a controsoffitto:

Applicazione a parete e controparete:

Soluzione con
Freccie Led lineari

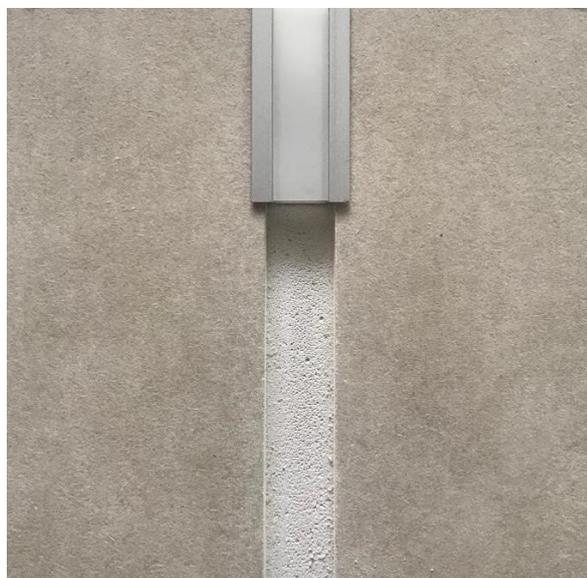

Soluzione con
raccordi a croce

Il fissaggio dei profili avviene in ultimo, prima creare disegno luce, raccordare con lastre, stuccare, pitturare e fissare i profili con un filo di silicone trasparente.
